4<sup>th</sup> Complete:  
Sealed, epoxied,  
mold and mildew  
resistant coating.

# BEFORE

... cracks, leaks, or other damage to any part of your elevator pit can create a safety hazard to your riders and the maintenance crew ... and before more oils or excrements can cause a health hazard to anyone that comes within breathing distance, contact the elevator pit experts.

We work on every aspect of the pit to make it the healthiest and safest it can be; degreasing, removing oils, repairing and resurfacing the hoistway, pouring a new pit slab, painting, epoxy coating, and waterproofing. We do it all and we do it right.

# AFTER

... when we're finished, your elevator pit will be a **SAFE PIT®** – guaranteed!

## We restore elevator pits:

- Complete pump outs
- Cleanings and wash-downs
- Mold removal
- Disinfecting and deodorizing
- Painting and coating
- Hydro oil clean ups
- Concrete repair
- Concrete sealing
- Epoxy Coating/Permaflex™ Sealants

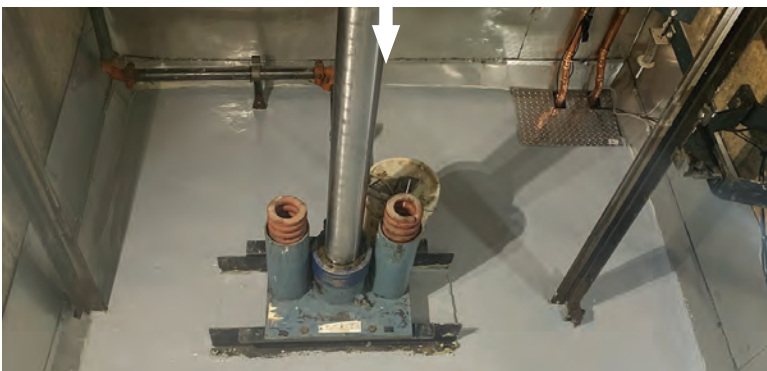

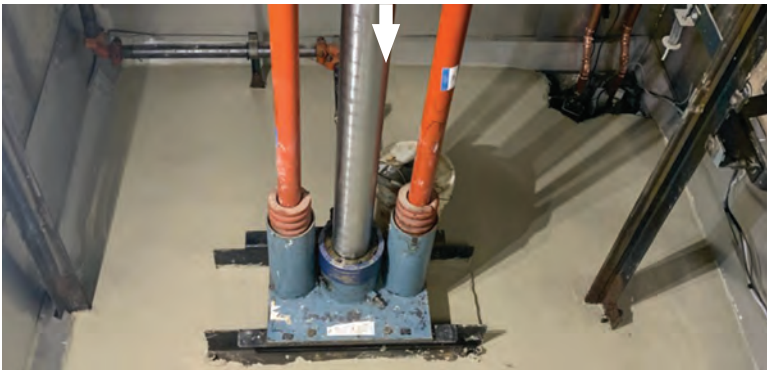

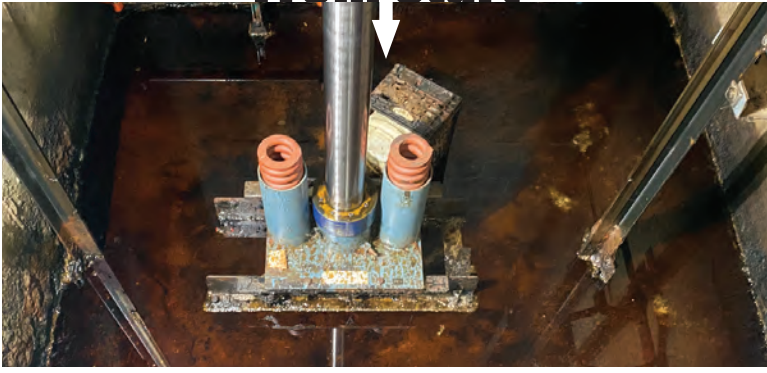

We follow strict adherence to all guidelines mandated by O.S.H.A. inc. Confined Space Directory (CSD) and the E.P.A. Subservice Intrusion Act (S.S.I.). We apply 100% solid epoxy coatings for the walls and floors. We also use yellow caution paint over any steel or springs to help avoid tripping hazards.

*Everything we do is to create the healthiest and safest elevator pits possible!*
